## PG42 Planetary Gearhead

The PG42 series gearheads couple directly to AML D42 stepper motors and are suitable for use in UHV environments. Primarily used for increasing resolution, torque multiplication and inertia matching. They are designed for maximum torque capacity, high efficiency and low backlash.

- Suitable for use below $1 \times 10^{-10} \mathrm{mBar}$
- Multiple ratio options, 4:1 through 100:1
- Low inertia
- High precision, low backlash
- Service life > 10,000 hours
- Bakeable to $200^{\circ} \mathrm{C}$
