

RSX Rotation Stage

UHV Rotation Stage

AML ultra high vacuum compatible rotation stages are manufactured with UHV compatible material and construction methods in an ISO 7 cleanroom and utilise AML D35.1 UHV stepper motors.

The RSX3K6 features a precision cross-roller ring bearing providing high rotational accuracy capable of bearing loads in every direction. It has a 18mm clear aperture, anti-backlash spur gearing and can optionally be fitted with an optical UHV compatible rotary encoder.
